- Wooden Display
- Acrylic Fixtures
- Store Fixtures

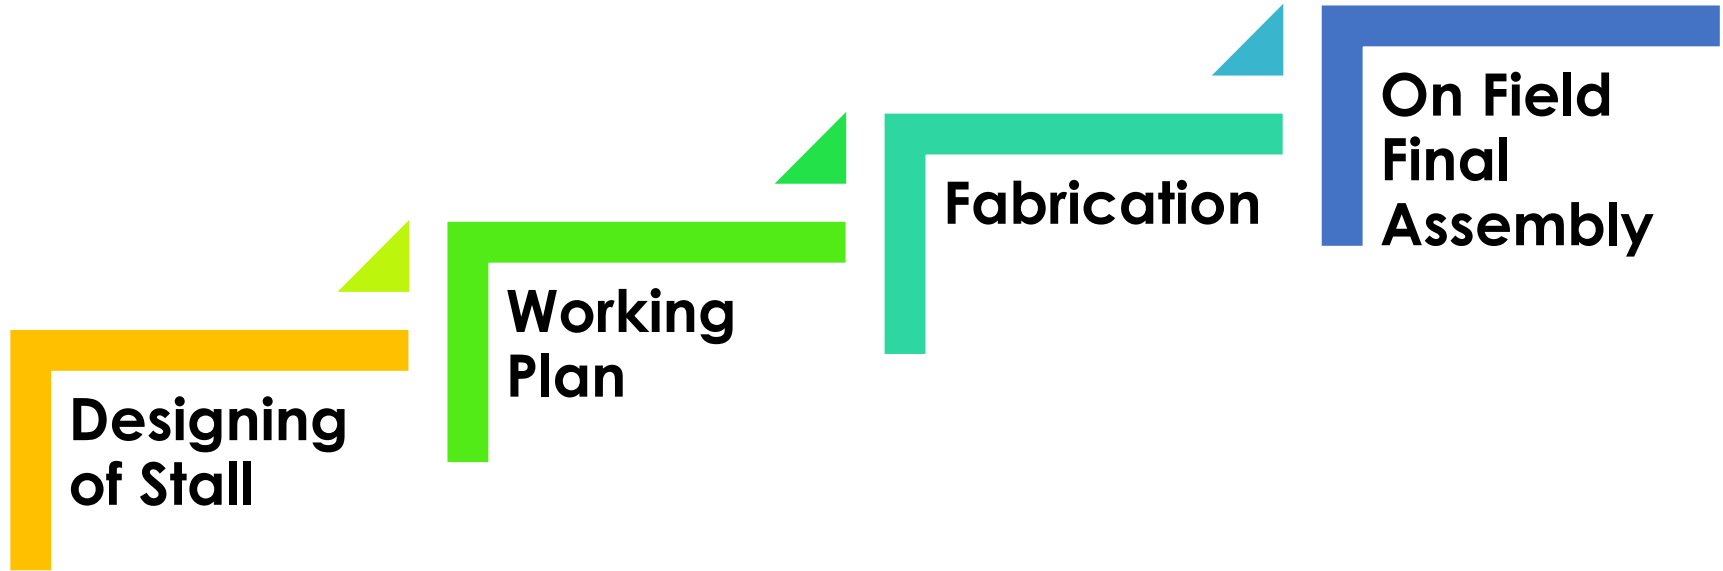

# Brochure Designing/ Printing

- Brochures serve as an interactive guide.
- Get professionally produced, good quality postcards, flyers, brochures, and business cards

# Our Work Process

# Fabrication (Exhibition)

Every stand is fully customized according to your precise requirement.

Our in-house production team builds the whole stall at our workshop and provides regular updates on the progress of the stand.

The background is a complex, abstract geometric pattern of blue lines and dots, resembling a molecular structure or a network diagram. The lines are thin and intersect at various points, creating a web-like appearance. The dots are small and serve as nodes in the network. The overall color scheme is a range of blues, from deep navy to lighter, almost white highlights where the lines intersect.

# EXHIBITION STALLS

The exhibition is a great way to raise brand awareness, gain individual feedbacks, build new relationships, and grab multi-folded opportunities.

It may sound easy, but there is a great deal that, as an event expert team, we cater for day-to-day client events.

Right from selecting exhibition stand, pre-event setup run, taking care of AV-sound-cable-power-equipments, creatives and material designing, conceptualization, data collection and questionnaire, trained professionals, sketches, 3D, 2D render, slideshows, backdrops, and the list goes on.

We manage the event so that you can focus solely on your business goals

**mDENSE™**

Advanced dissolved air flotation technology for wastewater treatment. mDENSE™ is a compact, efficient, and easy-to-install system that provides superior performance in removing suspended solids, oils, and greases from wastewater.

*World water works*

**Ideal DAF™**

Dissolved Air Flotation (DAF) systems remove suspended solids, fats, oils, greases and non-soluble organics by a process of dissolving air into water under pressure.
